

Dear students!

Our last cluster of CMDIE lessons is scheduled for Wednesday, 2. February 2005. I will be in Salzburg and we will have opportunity to discuss also some topics that are potentially not clear to you. The work will be organized in the same way as in the first cluster, except that we will finish it in a single day. Please read instructions below!

You will find, on our **web page**, all course material needed.

**In the last cluster** (2. February 2005) I will present a short overview of previous chapters 1 to 7 (1 hour). Then we are going to cover chapter 8 (2 hours) (see **notes files**: chap08\_4up.pdf on [http://pluton.ijs.si/~roman/usalz/cmdie04\\_05/notes/](http://pluton.ijs.si/~roman/usalz/cmdie04_05/notes/)). The last **homework** was assigned to you from our text book (Exercises) and **review questions** will be presented. (see: [./homework](#) and [./review](#)). A **sample exam** will also be shown!

#### LESSONS:

There is no need to study the notes of Chapter 8 (Numerical Integration and Integral Equations) because we will go together through the notes on Wednesday 2.2.2005 from 10:00 to 12:30.

#### LABS:

In the directory: [./matlab](#) you will find the file: ch08\_instructions. You will solve your assignment in the same way as by previous clusters and **post your labs work** on the directory: **/home/scicomp/trobec/labs** until February 3. at 23:30. Please, **set file permissions** in such a way that I will be able to read your files!

See you,  
Roman Trobec
